Veriday Intranet IN A BOX ®

Collaboration. Not Resignation.

Veriday | Liferay

North America is experiencing attrition due to lack of employee engagement.

Studies show companies lose $500 billion in lost productivity each year.* Veriday **Intranet In A Box**® helps employers combat this through its intuitive design, creating a successful work atmosphere where employees feel at home, so they can focus on what they do best and not worry about tricky technology. And for you, a workday without worrying about costs associated with employee turnover.

Our 3 Month Plan.

This package is for Business Leadership struggling with either renewing their existing Intranet and putting themselves on a better foundation OR wishes to stand-up their first Intranet. In both cases, the client is desiring to significantly enhance their Employee Experience and have a strong foundation to improve from.

Discovery

5 – 10 days

Discovery is a planning and setup phase to put in place the foundations for project and solution success. Veriday will work with you to: Baseline the project plan and establish the project governance for status reporting and meetings. Elicit your highest level requirements through stakeholder workshops, requirements and solutioning sessions

Deliverables
Project Plan
Requirements Outline
Change Management Plan
Development Standards
No Regrets Solution

Design (UI/UX)

10-20 days

Design (UI/UX) is the next stage of project progression. Using the Design Thinking methodology, we collaborate with you to validate the proposed UX. The Veriday team will also continue to progress the solution architecture, the development and the iterative prototyping, so requirements can be progressed into a usable solution understanding as the project unfolds.This also allows the quality of the product to be measured in a progressive way

Deliverables
Requirements Refinement
*Creative Mockups*
UI/UX

Implementation

30-40 days

Implement is the primary development and migration phase. Partnering with client stakeholders, we will implement the corporate site theme strategy and design. We will translate the design into physical site templates and configured Liferay code, ready for content. The content and navigational structures of the corporate website will be developed and finalized according to the agreed approach.

Deliverables
Completed Solution Development

Validation

2 weeks

Validation is the QA execution, migration and deployment planning phase. Partnering with client stakeholders, we will perform the necessary quality assurance testing, performance testing as a focus for this engagement and provide support for your User Acceptance Testing (UAT). The Veriday team will work with you to execute the remaining training, content migration, and deployment to enable the solution to Go Live.

Deliverables
System & User Acceptance Tested Solutions
Training Materials

Deployment

1 week

Deployment is the next to final project phase in which the solution is transitioned to the new environment. (Go Live) process is scheduled immediately after solution training, Client Acceptance Testing, completion, and solution sign-off has been achieved. This phase also incorporates Project Handover when the solution is transitioned to the operations team and sometimes the sustainment team.

Deliverables
Deployed Solution
Change Managed
*Knowledge Transfer*

Warrant & Support

1 month / Ongoing

Warranty is the final project phase in which any remaining solution defects are addressed by the implementation team prior to project closure and transition to Veriday's Ongoing Support Team. Veriday delivers warranty typically as part of our Ongoing Application Management team and processes.

Deliverables
Support & Bug Fix
